Press Release

AIRCAT Pneumatic : 6525 In-line cut-off tool

Designed for Auto Tech Professionals

Jupiter, FL December 2015: In April 2016 Florida Pneumatic Manufacturing Corporation is introducing its new In-line cut-off tool.

• FEATURES

- The AIRCAT 6525 features a 0.6HP stall resistant motor.
- The In-line design with the side-mounted cut-off wheel allows more precision straight-line cutting than a conventional cut-off tool.
- Outside of automotive aftermarket and recreational vehicle applications the AIRCAT design In-line cut-off tool is ideal for cutting roofing shingles, tiles and siding.
- With a free speed of 20,000 RPM the 6525 has a fast cutting action and will cut up to 3/8" diameter rolled steel and 18 gauge steel sheet.
- The molded composite housing cover and grip adds comfort while insulating the operators hand from the effects of cold air.
- The 6525 through handle exhaust keeps exhaust air away from the cutting area.

This and other AIRCAT tools are readily available from leading Tool & Equipment & Industrial Distributors.

For further information regarding the AIRCAT 6525 and other AIRCAT tools please contact:
